

## A Survey about College Life

Recently we did a survey. We interviewed many students about college life and study. The questions are listed below:

1. Are there so many subjects to learn?
2. What's your first impression of the college life?
3. What do you think of the electives to be chosen in the college?
4. Have you adapted to the new life of college?

The responses are listed below:

No.1	No.2	No.3	No.4
No	beautiful	Choose the electives we are interested in	Yes, very quickly
Yes	expecting	Very good	Just so so
No	busy	It can improve our quality of life	Yes
Yes	In a hurry	Good to learn	Yes
Yes	Much freedom	Troublesome	No
No	freedom	Never to choose	Yes
Yes	freedom	Arouse our interest	Yes

As can be seen from the form, different students have different ideas. But each considers that they should work hard in college and make good friends.

A majority of students feel that college life gives more freedom compared with high school. Everyone is excited and looks forward to the college. For them, college life has been a great learning experience, and most of the learning process has taken place outside of the classroom. College life is perhaps the most remarkable years of their life. Some of them make life-long friends. They also think it is worth choosing some electives which can broaden their experience in the college. All have realized how wonderful and special their college experience has been. Most of the people surveyed said they adapted to their new college life. They wish they could freeze their time and go back to their past. In their opinion, college education is much more than sitting in a classroom and studying for a degree.

After the survey, we hope everyone should prove himself a qualified college student.
